Re: Report Describing the Incremental Reductions in the Purchases of Electricity During a Calendar Year Due to Customer Operations of, or Purchases from, On-Site Renewable Energy Technologies, Fuel Cells, Cogeneration Equipment, On-Site Generating Facilities Eligible for Net Metering, or Cogeneration Facilities of 60 KW or Less Which are Eligible for Net Metering: January 1, 2002 Through December 31, 2002.

Dear Ms. Cottrell:

Fitchburg Gas and Electric Light Company ("FG&E" or "the Company") hereby files with the Department of Telecommunications and Energy ("Department"), pursuant to 220 C.M.R. 8.07(2), the Company's Annual Report Describing the Incremental Reductions in the Purchases of Electricity During a Calendar Year Due to Customer Operations of, or Purchases from, On-Site Renewable Energy Technologies, Fuel Cells, Cogeneration Equipment, On-Site Generating Facilities Eligible for Net Metering, or Cogeneration Facilities of 60 KW or Less Which are Eligible for Net Metering: January 1, 2002 Through December 31, 2002.

The Company currently has one customer that falls under the category outlined above. This customer is a residential customer that generates power under a net-metering contract. The Company does not have actual kWh output, since the readings provide only the net load. However, during 2002, the customer's kWh consumed was greater than kWh generated.

If you have any questions regarding this filing, please feel free to contact me at 603-773-6441.

Thank you for your attention to this matter.

Very truly yours,

A handwritten signature in black ink that reads "Karen M. Asbury".
